

DEVOPS ENGINEERING

with

PORTFOLIO BUILDING

Not only a devops course
but builds **software portfolio**
for yourself.

THIS COURSE IS FOR YOU IF YOU ARE

Watched 100 tutorials
built nothing

Degree in hand
still can't ship

You can build
can't ship it

Rejected again in interview
or didn't receive a invitation

CURRENT SE TREND

- No more specialis it is all about generalist
 - You can be a specialist in web development or mobile development or AI add devops as your second skill
- Companies trust AI with building software but not handling the deployment .by learning devops you are the forerunners
- Interns interviews have become like Software engineer interview so only way to succeed it by strong hand on practices
- No more I did this project and that project (because AI can do it) but you are hired to make decisions .So justify your decisions

BUILD. DEPLOY. **IMPACT.**

LEARN DEVOPS. BUILD YOUR FUTURE.

Not only a devops course
but builds **software portfolio**
for yourself.

WHO IT'S FOR

Fresh Graduates

Undergraduates

Job seekers

Software Engineers

QA Engineers

IT Professionals

Soloprenur/enterprenur

Anyone Interested
in DevOps

WHAT YOU GET

- ✓ Introduction to all the devops tools
(not a deep course if needed we need to redirect them to specialist courses)
- ✓ Best practices in industry
- ✓ **2-4 GUARANTEED INTERNSHIPS** 
- ✓ Portfolio building
(3 main projects and 15+ scenario based mini projects)
- ✓ Work as team (github , project management)
- ✓ Face architecture interview confidently
- ✓ CV analysis
- ✓ Question bank for interview preparation
- ✓ Best projects will be **mentored** after
program ends (you heard it right)
- ✓ Certification of completion 
- ✓ Not 1 programme. **3 customized programs**
based on your need.
- ✓ Best **security** practices in the era of **vibecoding**

- ✓ Startup exposure (3)
- ✓ Have trained 14+ interns
- ✓ Delivered more than 25 projects in span of 5 years
- ✓ Clear exposure to AWS, EKS, GitHub pipeline and Terraform

TOOLS DISCUSSED – ROADMAP & WHY NEEDED

From **Code** to **Cloud** – The DevOps Journey

AN GLIMPSE OF A PROJECT YOU WILL BE WORKING ON

**THE BRIEF — read this
to the candidate**

You must design the cloud infrastructure for a food-deals app with four client surfaces: a client mobile app, a vendor mobile app, an admin dashboard (web) and a client display website.

Users are spread across the UK and the USA, and speed matters. The app is image-heavy. The client insists on an enterprise-grade database.

CLIENTS

4 surfaces
(2 mobile, 2 web)

REGIONS

UK + USA

PRIORITY

Low latency /
speed

CONTENT

Image-heavy

DATA

Enterprise
database

PAYMENTS

Implied
(deals / checkout)
